

VP 525

For Foreign & Domestic 5.25 Screw Type Valve Boxes

Specifications:

The **Debris Plug** is Thermoformed from .083 Heavy Duty Acrylonitrile butadiene styrene (ABS) and tapered from 5.375 diameter to 4.25 to incorporate a wedge/ plug fit inside the Valve Box Base. The Top is machined with a .125" lip to prevent the **Debris Plug** from penetrating past the Stem Base. An Adjustable Lifting Strap is provided for easy removal and made from 5/8 x .025 Polyester. The lifting strap will adjust to fit various depths and withstand over 200 lbs. of break strength. The Strap is inserted through two opposing tabs which enable three unique features; Allowing for Lifting Strap Height adjustment, Acting as a stress inhibitor while lifting heavy dirt or mud and providing a means to torque and tighten the Debris Plug securely into place. The Debris Plug is designed to stop dirt and debris larger than 5 microns in size while water is allowed to pass to help neutralize buoyancy effects.

Benefits:

- Heavy Duty ABS will withstand years of repeat use
- Lifting Strap adjust to fit various Valve Box depths
- Greatly Reduces Maintenance time
- Quickly Access Valves for Turn-Off
- Will Not Float away
- Easy to Install
- Easy to Remove
